

What is claimed is:

1. A base structure in a clothes dryer comprising;

a plurality of air holes in a base in a front area of an inlet side of a mixing pipe, the
5 clothes dryer having a base forming a bottom, a front cabinet forming a front face, a side
cabinet forming a side, a back cover forming a rear face, a top cover mounted both on top of
the front cabinet and the side cabinet, screw type legs 'L' at respective corners of the base, a
mixing pipe on the base forming a bottom for mixing gas sprayed from the gas nozzle and
primary air, a guide funnel mounted on an outlet side of the mixing pipe, a gas nozzle
10 mounted opposite to the inlet of the mixing pipe, a valve connected to the gas nozzle for gas
supply and control of the gas supply rate, and an igniter in a fore end of the mixing pipe for
igniting a mixture gas.

2. The base structure as claimed in claim 1, wherein the plurality of air holes are
15 formed at regular intervals along left/right directions of the base.

3. The base structure as claimed in claim 1 or 2, wherein each of the air holes is
formed in a long hole form having a length in a front/rear direction of the base.
